# Occupational Rehabilitation and Workplace Health

## Early Intervention and Recovery at Work

**Early Intervention**
Support for employees experiencing injury, illness or emerging workplace challenges before concerns escalate. Early intervention aims to maintain work connection, address barriers and support recovery and participation.

**Same-Employer Return-to-Work Support**
Collaborative planning and workplace support to help employees safely resume or maintain work with their current employer.

- Workplace assessment
- Recovery and return-to-work planning
- Medical case conferences
- Ongoing rehabilitation and case management
- Facilitated discussion services

## Vocational Rehabilitation and New-Employer Services

**New-Employer and Vocational Support**
Where return to the previous employer is not possible, Carfi helps individuals identify suitable vocational directions and pursue sustainable employment.

- Vocational assessment
- Vocational counselling
- Transferable skills analysis
- Job-seeking services
- New-employer support
- Vocational re-education or retraining
- Capacity support and coaching services

## Workplace Assessment and Injury Prevention

**Specialist Workplace Assessment**
Assessment and advice to support injury prevention, work capacity, rehabilitation and safe work participation.

- Workplace and ergonomic assessment
- Job task analysis
- Manual handling assessment and training
- Workplace risk assessment
- Pre-employment assessment
- Functional capacity evaluation

## Workplace Participation and Inclusion

**Workplace Adjustments**
Assessment and practical recommendations to support employee health, productivity and workplace participation while considering role and operational requirements.

**Neurodiversity Support Services**
Tailored assessment, workplace adjustment, coaching and capability-building services to support neurodivergent employees and help organisations create more inclusive and effective workplaces.
